Uranium Processing Research Reactors
BWX Technologies, Inc., P.O. Box 785, Lynchburg, VA 24505 – USA

ABSTRACT

Silicide fuel plate manufacturing is being re-established in the Research and Test Reactors group at BWX Technologies in Lynchburg, VA. An overview of the project scope, schedule and objectives is presented. This work is being performed with support from the U.S. DOE NNSA Material Management and Minimization program to help minimize the use of high enriched uranium for civilian applications.
