

RERTR 2014

35th International Meeting on Reduced Enrichment for Research and Test Reactors

International Atomic Energy Agency

Vienna, Austria

12-15 October 2014

The U.S. Department of Energy / National Nuclear Security Administration's Office of Global Threat Reduction will host the "RERTR 2014 International Meeting on Reduced Enrichment for Research and Test Reactors." The International Atomic Energy Agency (IAEA) is supporting RERTR by hosting the event at the IAEA Vienna International Center (VIC) in Vienna, Austria from 12-15 October 2014. A technical tour is planned for 16 October 2014. The meeting is being organized by Argonne National Laboratory and Idaho National Laboratory and will be the 35th annual meeting in a series on the same general subject regarding conversion of reactors within the Global Threat Reduction Initiative.

Information will be exchanged on the progress of national and international programs to develop low-enriched uranium (LEU) fuels and conversion analysis studies to convert research and test reactors to the use of such fuels. The meeting technical subjects will include development of new LEU fuels, design and safety analyses for reactor conversions, transportation and storage of spent fuels and HEU minimization for Global Threat Reduction.

Technical and policy experts interested in attending the RERTR-2014 meeting should register on-line at www.rertr.anl.gov prior to the registration deadline on 1 October 2014. The RERTR web site is open for on-line registration and contains a link to register for the meeting along with other information helpful for attendance and participation in the meeting.

Participants having interest in any of the LEU conversion topics listed above are encouraged to present a paper at the meeting. Please indicate your intention to submit a paper by completing the Abstract Submittal form found at the RERTR web site and submitting it along with an abstract of the paper no later than 15 September 2014.
