

RERTR-2015

36th International Meeting on Reduced Enrichment for Research and Test Reactors

Plaza Hotel Seoul

**Seoul, South Korea
11-15 October 2015**

The U.S. Department of Energy / National Nuclear Security Administration's Office of Material Management and Minimization (M³) will host the "RERTR-2015 International Meeting on Reduced Enrichment for Research and Test Reactors" with the support of the IAEA. The 36th International Meeting on Reduced Enrichment for Research and Test Reactors is also supported by the Korea Atomic Energy Research Institute (KAERI) and organized by Argonne National Laboratory and Idaho National Laboratory. The meeting will be held at the Plaza Hotel Seoul in Seoul, South Korea from 11-14 October 2015. Technical tours of KAERI's HANARO Research Reactor and the HANARO Fuel Fabrication Facility are planned for the following day, 15 October. Bus transportation will be provided.

Information will be exchanged on the progress of national and international programs to develop low-enriched uranium (LEU) fuels and conversion analysis studies to convert research and test reactors to the use of such fuels. The meeting's technical subjects will include development of new LEU fuels, design and safety analyses for reactor conversions, and transportation and storage of spent fuels.

Technical and policy experts interested in attending the RERTR-2015 meeting should register on-line at www.rertr.anl.gov prior to the registration deadline on 1 October 2015. The RERTR web site will soon be open and provide a link to register for the meeting along with other information helpful for attendance and participation in the meeting.

Participants having interest in any of the LEU conversion topics listed above are encouraged to present a paper at the meeting. Please indicate your intention to submit a paper by completing the Abstract Submittal form found at the RERTR web site and submitting it along with an abstract of the paper no later than 15 September 2015.
